Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 December 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 3-12, 40-42, 45-50 and 52-54 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) 46-50 is/are allowed.
- 6) ☒ Claim(s) 1, 3-12, 40-42, 45 and 52-54 is/are rejected.

DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/763,534. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are an obvious variation of the copending claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-12, 40-42, 45 and 52-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Halliday et al. '333 in view of Fischbach et al.

There is disclosed in Halliday a cartridge for use in a beverage preparation machine, the cartridge containing a beverage ingredient (such as chocolate or a liquid syrup for preparing a hot beverage) and being formed from substantially air and water impermeable materials (plastic), the cartridge including an inner member (outlet nozzle 5, ribs 48) and outer member 2, an inlet 4 for water, an outlet 5 for beverage and means for forming a jet of liquid, an air inlet 18, 19, means 52 for generating a pressure reduction of the jet of beverage, a lid 3 covering the inlet for water and outlet, wherein the inlet for water and the outlet are on the same side.

In regards to the snap fit of the inner and outer members, such is an obvious matter of design choice to one skilled in the art. Such is considered a method of manufacturing the device, the method of forming the device is not germane to the issue of patentability of the device itself. Therefore this limitation has not been given patentable weight.

Fischbach discloses that it is known in the art to provide a liquid ingredient (such as chocolate syrup or gel) within a capsule (cartridge) and provide hot water to the capsule for the formation of a hot beverage.

It would have been obvious to one skilled in the art to substitute the powdered chocolate ingredient or liquid syrup taught in Halliday with the liquid chocolate ingredient taught in Fischbach, in order to provide a form of ingredient which dissolves faster upon contact with hot water.

Allowable Subject Matter

Claims 46-50 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Hale is cited for its disclosure of the state of the art.
